<p>Annual monitoring and random sampling of all certified products and facilities will be conducted at the discretion of the IASC Certification Committee. Should a product not pass certification, or if revalidation is required, a second on-site audit of the manufacturing facility may be scheduled at the expense of the company requesting certification including any airfare or other travel fees, auditor's fee, meals, lodging and lab fees. This random review ensures that participants of the program maintain the highest levels of product integrity and compliance.</p>
